

Case Study

Rabobank

Providing a healthy working environment for their employees with Assurity Consulting

ASSURITY PLUS

LEGIONELLA MANAGEMENT

HEALTH AND SAFETY MANAGEMENT

FIRE SAFETY MANAGEMENT

The Rabobank Group is one of the world's most leading, sound and sustainable financial institutions. Their mission is to serve the economic interests of their members and customers. The Rabobank International London Branch is one of the main hubs that forms their international business where they provide financial products and services to a wide range of clients.

Rabobank required a central place to manage their workplace health and safety and the ability to accurately report their status to their senior management. Assurity Consulting introduced the organisation to Assurity Plus, their on-line solution for monitoring and managing health and safety across building portfolios.

"The Assurity Plus package includes excellent customer service and reliable, practical advice. Through the easy to use browser we can monitor our performance and concentrate our efforts on areas that require improvement and supports the management of our health and safety successfully. This visibility has helped save time and effort making it easier to demonstrate our workplace environmental performance and provide the reassurance that these areas are being managed effectively. It also increases our confidence and our ability to manage these critical areas." Leon Woolley, Health and Safety and Logistics Coordinator, Rabobank

As part of their service to Rabobank, Assurity Consulting also carried out legionella risk assessments for water services under their responsibility in their building and have helped Rabobank to produce a customised water management system and legionella policy. These documents allowed Rabobank to demonstrate to their stakeholders and building managers that an effective legionella management system was in place.

Rabobank also gained added reassurance that their maintenance contractors were carrying out the control measures required to minimise legionella bacteria growth in their water systems and that all relevant records were up to date.

As the relationship between Assurity Consulting and Rabobank strengthened, Rabobank asked Assurity Consulting to carry out regular health and safety and fire risk assessments. The support included an independent overview of Rabobank's health and safety policies and procedures
